

New Prestige Indexed 10 Pay Whole Life Insurance

[Music begins]

John Grevas: We know clients need stability in their financial plans. They have to know that their money will be there when they need it, whether they're using it to provide retirement income or passing it on to the next generation. But for many clients, protecting assets means choosing conservative investment options.

With limited growth potential and without death benefit protection...

...today's plans may not work tomorrow.

But Ohio National's new Prestige Indexed 10 pay whole life product has them covered. Because it's a whole life product, it offers the guaranteed cash value accumulation, guaranteed premiums and guaranteed death benefit protection you and your clients expect. But because it's an *indexed* whole life product, its growth is based upon market indices. That means more upside potential for accumulating assets, using those assets to supplement retirement income and providing a higher death benefit.

Give your clients something no one else in the industry offers, with Prestige Indexed 10 Pay whole life. Only from Ohio National.
